

Sprint 1 Plan

Project Name: Tutor Trade

Group Name: Slugademics

Sprint Completion Date: 7/7/2019

Revision Number: 0

Revision Date: 6/29/2019

Goal: The main goal for this first Sprint is to create basic versions of the Landing Page, Profile Creation Page, and the Home Page.

Task Listings:

User Story 1: As a busy undergrad, I want a fast and efficient login process because I am constantly short on time.

Task 1 Description: Focus on learning the software necessary for completing the task. We will be focusing on CSS, HTML, Javascript, and we will be using Django as a framework.

Task 2 Description: Use software tools to create web page with desired functionality and appropriate connectivity.

User Story 2: As a summer student, I want a profile creation feature to sign in for tutoring services because being able to communicate my needs on the site is important to me.

Task 1 Description: Focus on learning the software necessary for completing the task. We will be focusing on CSS, HTML, Javascript, and we will be using Django as a framework.

Task 2 Description: Use software tools to create web page with desired functionality and appropriate connectivity.

User Story 3: As a student, I want a home page to keep track of my notifications because having a central hub on the site seems like an essential feature.

Task 1 Description: Focus on learning the software necessary for completing the task. We will be focusing on CSS, HTML, Javascript, and we will be using Django as a framework.

Task 2 Description: Use software tools to create web page with desired functionality and appropriate connectivity.
